TownISP Rebate-Eligible Webcams

TownISP Video Mail currently supports drivers for cameras with 320x240, 320x288, 352x240, 352x288, 360x240, or 360x288 size fields. Due to the amount of CPU resources used by the camera driver, certain cameras will not function effectively on slower machines, causing degradation in the quality of the recorded video.

Please Note: The quality of recorded audio and video is directly tied to the quality of your webcam as well as your computer's specific capabilities. All rebate-eligible webcams have a built-in microphone.

Below is a list of **Supported and Recommended Cameras** for various speed machines, these specific cameras are eligible for the TownISP Webcam Rebate offered through SELCO:

The following Webcams WILL NOT WORK with TownISP Video Mail and are NOT Rebate-Eligible:

Camera	Reason
Orange Micro iBOT USB 2.0	Incompatible video size drivers (includes support for 160x120, 176x144, 256x240 only)
Veo Advanced Connect Driver	Installation issues. The auto install does not properly install the sound driver, consequently Video Mail will produce video from this camera, but no sound.
